We are proud to present to you, great quality “Japanese beef” (some describe it as the best)—consider that this is likely the best marbling (sashi) you can get. Because it'd be crazy to waste such produce, we started “Parts Unseen”, a movement to drive food sustainability within our kitchens where we innovate our processes to make the best of unloved parts that typically get minced or binned.

All prices stated in Singapore Dollars and are subject to prevailing 17% government goods and services tax
